

SMART Handovers

The professional handover solution for any scaffolding business

**SMART
SCAFFOLDER**

The SMART Handovers app key features:

- ✓ Record all handovers on your mobile
- ✓ Automatically tracks scaffolds in extra hire
- ✓ Record the customer's signature when they request a non-compliant scaffold
- ✓ Simple app that works on Apple and Android devices plus a desktop browser to create reports
- ✓ Automatically uploads a record of each handover to the cloud
- ✓ Diary functionality to record and photograph any events against a scaffold
- ✓ Partial handovers and decommissions possible
- ✓ Instantly send handover certificates to your customers
- ✓ No more lost paperwork and save on rekeying
- ✓ Functions both online and offline
- ✓ Captures customer signatures on site using your device
- ✓ Desktop console to create reports

Track all your projects with one handy paperless app

Our SMART Handovers app means that you can always track your scaffolds from the time the digital handover form is signed until they are decommissioned. Record any partial handovers or partial decommissions so you always know what is on hire. With photos and signatures captured digitally you'll have all the proof you need of any extra hire.

Simple reports

SMART Handovers provides a clear, visible and auditable trail of handovers, endorsements, and decommissions. SMART Handovers sends handover certificates directly to your clients once completed on your mobile device. You can also use the diary function to record and photograph any events against a scaffold – for example when you can't get access to a scaffold you've been asked to decommission.
